

Attached are the images from visualizer but the software doesn't show Diamond Grills on the visualizer. Anywhere there is currently Diamond Grills we are replacing with Diamond Grills GBG's(Grills Between Glass) with the exception of the living room windows which we are doing a full FDL(Full Divided Light) option as its in the main living room. Anywhere there is currently a colonial grid pattern that will remain and again GBG's but the authenticity of the home will be remained in place as Andrew isn't looking to change the look of the home.
